

FLAG ACTIVITY

**Aim:**

Every church has many schools/colleges/universities represented in its congregation – staff, pupils, governors etc. This activity aims to capture that information and represent it on paper flags and then have each school prayed for on a regular basis.

**Method:**

You will need to run off on thin card the template flag attached so that you have plenty available – one for each educational establishment represented in your church. They then need cutting out. You will need some thin canes for the flagpoles and glue or tape to join them together.

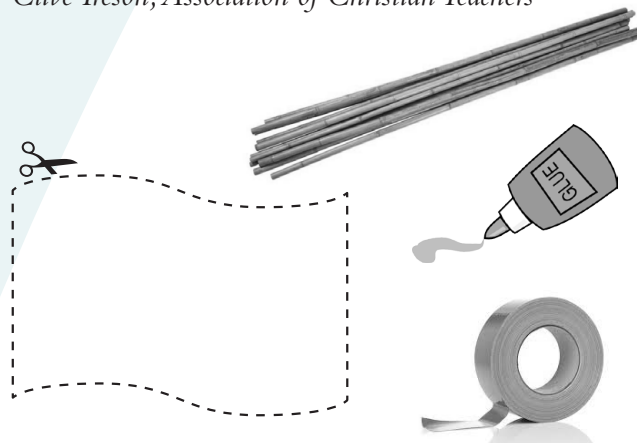

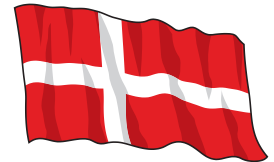

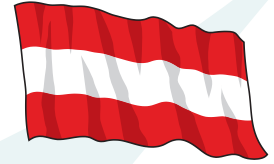

**Activity:**

In the service (or in Sunday School), have the educational establishments represented named and written on both sides of the flag, then ask all the children/adults linked to the educational establishment to write their names on both sides of the flag. Ask someone to colour in the rest of the flag.

Take time during the Education Sunday service to pray for each educational establishment.

After the service, put all the flags in a vase and use them for prayer on a regular basis.
