

Working Together To End
Homelessness

"The greatest gift of all is charity"

Introduction

- Breaker's Anointing Ministries is a Non-Profit Christian Organization registered in England & Wales under charity number: 1202076. We seek to serve local communities within the Boroughs of London.
- Our goal is to reach into communities and assist people in need from across all walks of life and sections of society.
- We believe it is necessary to go beyond the confines of what we refer to as "the church walls" and reach those that society has designated as unreachable, misplaced or rejected. We believe that as we do this important work together with our partners, we will have a serious impact on our ever worsening homelessness statistics.
- We all have a part to play in tackling homelessness and together as a team we can significantly help improve the services delivered to those experiencing homelessness, sleeping rough and refugees.
- We also want to be part of the solution to what triggers homelessness. Too many people are being pushed to the brink of homelessness as they face impossible choices. More must be done to prevent people from becoming homeless in the first place, and to remove the barriers that are preventing them from leaving homelessness.

Partnership

BAM works in partnership with Green Pastures who take on the responsibility of purchasing the properties for occupation. We are then tasked with obtaining referral partners for occupation of those homes.

We are currently establishing relationships with a number of referral agencies.

Credentialed Partners:

Partnership

Credentialed Borough Partners:

Delivery Partners:

We are also Developing Relationships with:

The **Problem** & Who is **Homeless**

- People become homeless for lots of reasons, and often it's the accumulation of multiple, constant pressures that act in unison to cause homelessness.
- People face challenges like the loss of a job, domestic violence, mental illness, release from the care system with few resources, breakdown of a relationship and the death of a partner or parent and that's just to name a few.
- Anyone that is faced with a set-back can stumble; a series of mishaps can also cause a person's life to unravel.

Media Reports

- ITV News at 10:00pm on 24 January 2023 reported:
"The issue of homelessness and sleeping rough has reached an all time high with issues worsening due to increase of rent and high cost of living which have forced people out of homes and on to the streets. "
- ITV further reported on 17 March 2023:
"...there was an increase of 858 people sleeping rough daily and 1,300 increase seen on the streets of those bedding down on local streets/pavements in December 2022".
- There is an increase of **1 in 23 students** that are experiencing homelessness.
- The total number of rough sleepers went up by a quarter and new rough sleepers went up by **35%**.
- Between **July** and **September** 2022 more than **300,000** people were left sleeping on London's pavement

Criteria & Assistance

- BAM's criteria for assistance is to house **single males/females**. We are aware statistically that the male category of homelessness is of a far higher proportion/percentage than females and therefore of a higher focus has been placed on this category.
- Being a **UK citizen or having indefinite leave to remain** is a requirement, however where possible, BAM will try to assist on immigration applications in order to gain Leave to Remain or gain citizenship for those who have no status.
- BAM will work alongside local authorities to help individuals obtain **housing/rent payments** as well as financial assistance in areas of need.
- Those receiving housing with us will obtain further support in an holistic way to help restore them back into society. This includes but is not limited to; **assistance with job applications**, Job centre bookings, writing CVs, money management workshop, prepping for interviews (skills & knowledge), confidence building, 1 to 1 meetings and many more etc.
- At present we are **unable** to offer accommodation to those who are in **rehabilitation units** or **using drugs** but this service will soon become available.
- BAM is a **Christian organisation**, however Individuals are not assessed or offered accommodation based upon their faith or belief – **all are welcomed!**

Age of Those Sleeping Rough

Age of people seen rough sleeping by outreach services.

Demographics

B.A.M's criteria is targeted initially at males and females but not those currently using drugs or coming out of rehabilitation units. This service will be offered in the near future

Gender

Gender of people seen rough sleeping by outreach services.

Base: 103 people seen rough sleeping whose gender was known. This excludes 3 people whose gender was not known.

Qualified Volunteers

BAM have a group of **highly qualified volunteers** who will contribute valuable time, expertise and knowledge on a daily basis.

We provide effective training, monitoring and care support in areas such as:

- **One to One meetings** with individuals and tailoring support to their individual needs
- **Housing Assistance** with local authority (including help to connect with a designated housing/support officer ; appointment bookings, completing of all necessary paperwork)
- Creating **tailored CVs** and cover letters to register or apply for employment
- Assisting our clients in the accessing of job sites , and helping them **prepare for interviews** by providing them with a more in-depth understanding of the role & position and work sector involved
- Conducting various **Workshops and Seminars**, such as financial workshops conducted to help equip individuals with money management skills or helping to improve their digital and computer skills
- **Home assistance** such as taking individuals shopping, walking etc.

Greater London Statistics

- According to the latest Combined Homelessness and Information Network (CHAIN) figures published on 31 January 2023, **3,570** individuals were recorded sleeping rough in the capital between October and December 2022.
- **This is a 21% increase on the figure from the same period last year.**
- Even more worrying is the number of **new rough sleepers** has increased by **29%**.
- Almost **48%** of the people that were recorded by outreach teams were sleeping on the streets for the very first time.
- Many homeless charities have experienced a **14%** increase in the number of people who have approached them for support. This is nothing less than a homelessness emergency, which has only been compounded by an extremely cold winter and an ever rising cost-of-living post covid.

Note: "The figures released on 31 January 2023 only represent those people sleeping rough or found bedded down on the street, or in other open spaces or locations not designed for habitation, such as doorways, stairwells, parks or derelict buildings. The report does not include people from "hidden homeless" groups such as those "sofa surfing" or living in squats. Many more people are either staying in emergency shelters, ride night buses or stay hidden out of sight".

Annual Report: Greater London Rough Sleeper Population Analysis 2021-2022

- The flow, stock and returner model chart below categorises people seen rough sleeping in the year according to whether they have also been seen rough sleeping in previous periods.

Category	Description
Flow	People who had never been seen rough sleeping prior to 2021/22 (i.e. new rough sleepers). Those within this category are further subdivided as follows: Unidentified - those new rough sleepers recorded without a name, and with only one contact. Identified - those new rough sleepers recorded with a name, and/or with more than one contact.
Stock	People who were also seen rough sleeping in 2020/21 (i.e. those seen across a minimum of two consecutive years).
Returner	People who were first seen rough sleeping prior to 2020/21, but were not seen during 2020/21 (i.e. those who have had a gap in their rough sleeping histories).

Boroughs with the Highest Number Of Rough Sleepers

(Continued)

- Although Heathrow is located within the Borough of Hillingdon and is not actually a borough in itself, it is counted separately for the purposes of CHAIN reporting due to the specific rough sleeping issues found there. Where rough sleepers have been seen by outreach workers on public transport their contacts are ascribed to "bus route" or "tube line" rather than to a particular borough.
- The Boroughs in which the greatest numbers of rough sleepers were seen in 2021/22 were Westminster, Camden, Ealing, Lambeth and Newham.

Immigration Status Data (Continued)

- The previous table shows the immigration status amongst different nationality groups, excluding UK nationals. It should be noted that this information is self-reported or based on what outreach workers could conclude from the information given, and in many cases it has not been independently verified by an immigration adviser. Therefore, immigration status data should be treated with caution.
- The table shows that the most commonly recorded immigration status was EEA national with status under the EU Settlement Scheme not know (621 people).
- The second most commonly recorded status was Indefinite Leave to Remain or Settlement, with 464 people having this status

HELP US!

- Help us end homelessness
- Help us put an end to this crisis of those sleeping rough
- It will take a true partnership of companies, institutions and organisations to help save lives and help tackle this crisis.
